Interference signals

### Benefits

Aluminium-laminated plastic foil static screen with tin-plated drain wire minimises the interference of high frequency, electromagnetic fields

Decoupling of circuits by means of twisted-pair (TP) design (crosstalk effects)

Low capacitance due to polyolefin-based insulation

### Application range

In measurement and control engineering

Electrically intended for use when modern process computers have to process large volumes of data, e.g. high-capacity computer systems in waste incineration plants or sewage treatment plants

These cables are suitable for fixed installation in dry or damp rooms and, in case of versions with a black outer sheath, also for outdoor use

Thanks to reinforced, nominal/ minimum average wall thickness of the outer sheath of at least 1.8 mm, for applications, where a reinforced outer sheath may turn out to be advantageous.

### Product features

Outer sheath colour:

black for outdoor applications or

blue for intrinsically safe systems

Flame-retardant according IEC 60332-1-2

### Norm references / Approvals

In the style of EN 50288-7

### Product Make-up

7-wire bare stranded copper conductor,  
core insulation made of polyethylene (PE),  
cores twisted into pairs,  
pairs stranded in layers

Complete stranding contains 1 core for communication (core colour orange);  
the communication core is omitted on single-pair versions

Foil wrapping,

static screening made of aluminium-laminated plastic film with tinned drain wire
